

SL Trading LLC are the leading providers of the latest in high-visibility uniforms and work-wear in both the GCC and Middle East.

Alongside the sleek look, our work-wear is manufactured using superior and cost effective **micro-fibre fabric** technology designed specifically for the region's hot climate. It provides UV protection and unmatched texture to keep workers both safe and comfortable in professional and high risk environments.

All our products can be tailored to fit specific requirements and branding.

MICROFIBRE

MICROFIBRE VS MICROMESH – Innovation vs. Limitation

- *Most high visibility work-wear and uniforms in the GCC and Middle East markets are made from low-grade quality micromesh (or non-microfibre) material, generally using standard or core-spun polyester.*

| MICROFIBRE | MICROMESH, BLENDS, CORE POLYESTER |
|---|---|
| Multi filament core | Hollow core. No multi filaments |
| Soft, silky, lightweight feel | Scratchy on skin, coarse material, heavier feel |
| Quick dry fabric, anti-bacterial | Problems with sweating and discomfort |
| Highly breathable | Doesn't breathe, leading to heavy sweating |
| COST EFFECTIVE: Durable , long-lasting | Poor durability, wears out quickly |

Garment Compliance - Industry Standards

The micro-fibre garments have been specifically developed using super soft materials to enhance wearer comfort in all conditions whilst maintaining the highest level of safety standard.

Safety Characteristics

- *Fluorescent characteristics comply with AS/NZ 1602(1999) High Visibility safety garments in Class "D/N".*
- *Fluorescent colour conforms with AS/NZ 1 906.4(1997) High Visibility Materials for safety garments.*
- *Reflective tape applied conforms with AS/NZ 1 906.4 class R and is applied in the harness style in accordance with AS/NZS4602 class N.*
- *Enhanced cover of the fabric used in this garment creates EXCELENT UPF50+ UV Protection in accordance with AS/NZ 4399(1996).*

MEASUREMENT SPECIFICATIONS

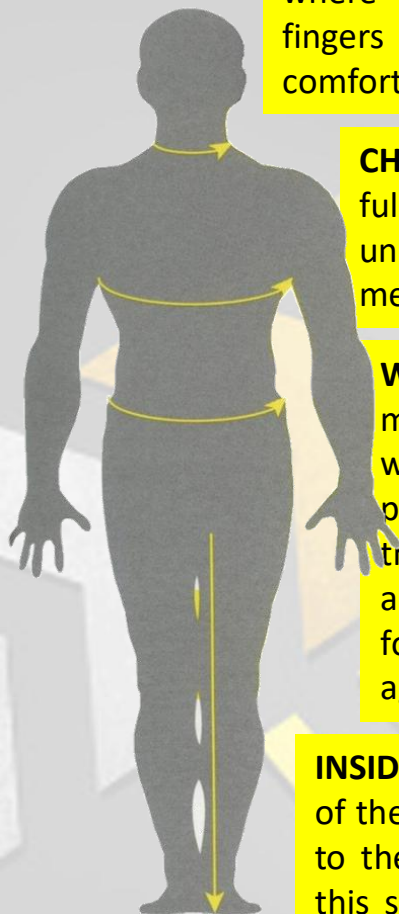

HOW TO MEASURE YOURSELF (MALE)

NECK : Measure around your neck where the collar sits, allowing two fingers behind the tape measure for comfort

CHEST : Measure around the fullest part of your chest at the underarm point, ensuring tape measure is level across the back

WAIST : Measure with a tape measure around your natural waistline, this is where your pants sit. Do not measure over the waistband of the pants you are wearing! You should measure for a firm yet comfortable fit against the skin

INSIDE LEG : Measure from the fork of the seams under your crotch down to the top of the heel of your shoe, this should be about 1 cm from the floor
